JAMES SPENCE,

1, LOWER HALL-STREET, MONTROSE,

AND

ALEX^R SPENCE & CO,

28, HIGH-STREET,

LICENSED BY

WHO IS SPECIALLY

TO HER MAJESTY

H.DODSON of LONDON,

APPOINTED PURVEYOR

THE QUEEN DOWAGER

AND H. R. H. THE DUCHESS OF KENT,

TO MANUFACTURE THE

PATENT UNFERMENTED WHITE & BROWN BREAD

MILK BISCUITS AND BISCUIT POWDER

FOR INVALIDS' AND INFANTS' FOOD;

PRESBURG WINE AND FANCY BISCUITS, CAKES, &c.

The following Address is by Mr H. Dodson, the Patentee :—

TO THE NOBILITY, GENTRY, AND PUBLIC—

THERE can be no greater proof of the unfermented process being of essential importance to health, than is afforded by the fact that I have had the unprecedented honor conferred on me by the patronage of Royalty, with that also of many noble families, and upwards of eight hundred and thirty distinguished Physicians and Surgeons, including eighteen who attend the Queen and the Royal Family.

The White Bread made according to this Patent, consists of the finest flour, table salt, and pure water: the Brown, of the best wheaten meal, table salt, and pure water. It is light without yeast or leaven in its composition; the salt being formed whilst kneading the dough, and thus producing the lightness. It is used in the families of the most eminent medical men, many of whom have been essentially benefited, together with a large number of their patients, in extreme cases of suffering from indigestion, and other painful diseases arising therefrom; and it has been instrumental not only in preserving, but restoring health, when all other means have failed.

The Milk Biscuits and Biscuit Powder, for Invalids' and Infants' food, made by the Patent process, have proved more nutritious than any other articles yet discovered. They have been the means of restoring to health the most delicate.

The various descriptions of Unfermented Fancy Bread, Biscuit, and Cake, are highly esteemed for their agreeable and nutritious qualities, the latter of which I have been honored with orders to supply at the Royal Castle, Windsor. Eminent medical men have recommended me to manufacture some cakes without butter, which have been highly approved of. These are considered to be most suitable to delicate persons, as well as to those in health.

The subjoined testimonials from gentlemen who rank high in

the profession, will render unnecessary the additional statement of facts from private individuals, many of which are in my possession, and may be seen on application.

I am, your obedient Servant,

HENRY DODSON, PATENTEE,

98, Blackman-street, London.

This address is signed by the most eminent members of the faculty in London, Edinburgh, and Dublin, and elsewhere. The following medical gentlemen in Montrose also highly approve of the Patent Bread, viz. :—

RICHARD POOLE, M.D.
HENRY HOILE, Surgeon.
D. NIDDRIE, Surgeon.
DAVID JOHNSON, M.D., Surgeon
GEO. L. SMITH, M.D.
ANDREW F. FERGUSON, M.D.

W. H. ARROTT, Surgeon.
D. DUNCAN, Surgeon.
SAMUEL LAURENCE, Surgeon
JOHN ROSS, Surgeon
GEO. STEELE, M.D.

JAMES SPENCE and A. SPENCE & Co.

Who are alone authorised by the Patentee to make the UNFERMENTED BREAD in MONTROSE, beg to inform the nobility, gentry, and public, that they have made arrangements to supply the inhabitants of Montrose and its environs with the following articles of the finest quality :—

PATENT UNFERMENTED BREAD, (made in Loaves, 3d. and 6d. each). Wite—Brown—Tea Loaves. Dinner and Supper Rolls to order.

PATENT UNFERMENTED BISCUITS. Abernethy—Captains—Meal. Fancy Biscuits in great variety.

PATENT UNFERMENTED MILK BISCUITS, for Invalids' and Infants' Food, in Canisters, 2s. each.

Genuine PATENT BISCUIT POWDER, in Canisters, 1s. 2d each ; with Directions for Use.

The two preceding articles have been found to agree with Infants better than any other food, and have been the means of preventing and curing fits, and some other diseases to which they are subject.

PATENT UNFERMENTED PRESBURG WINE BISCUITS, In Canisters, 2s. each. Highly recommended for their crispness and richness of flavour, and considered of incomparable excellence.

GINGERBREAD and GINGERBREAD NUTS, made by the Patent Unfermented Process, are decidedly more wholesome and superior in flavour, being perfectly exempt from the noxious ingredients alum, potash, &c. hitherto invariably employed in their manufacture by the ordinary method.

FINEST GENUINE WHEATEN FERMENTED BREAD. Brown, Cottage, French, Best Whites, Best Flour; Fermented Dinner, Sandwich, and Supper Rolls to order. Buns—Plain, Currant, and Bath.

BISCUITS packed in Tin Cases, of all sizes, for families residing in the country.

BISCUITS and FLOUR in Bond, for Ship use or Exportation.

* * Orders for the Cart to call will be punctually attended to.

To Intending Purchasers of Drapery Goods.

JAMES ANDERSON,

1 & 2, HIGH-STREET, AND 51, MURRAY-STREET, MONTROSE,

RESPECTFULLY invites intending purchasers of Woollen and Linen Drapery Goods to an INSPECTION of his very EXTENSIVE STOCK, which is not excelled in town; and as he conducts his business on the principle of charging all alike, whether a judge of quality or not, he is confident they cannot anywhere be served on better terms.

At present on hand, all fresh from the Manufacturer,

A large lot of BRITISH and FRENCH MERINOES, ORLEANS, and COBOURG CLOTHS; together with a complete assortment of all other kind of GOODS suited for Ladies' and Gentlemen's Clothing.

Books, Stationery, Book-Binding, and Printing.

D. ALEXANDER, Bookseller, High-street, Brechin, respectfully returns thanks to the inhabitants of Brechin and neighbourhood for the very liberal patronage he has been honoured with, and takes the present opportunity of intimating that his STOCK of BOOKS and STATIONERY is at present very complete, which, as formerly, will be sold on the Smallest Profits.

Ledgers, Day and Account Books, ruled to pattern, and bound in the most substantial manner, and on the shortest notice. On hand, a choice Selection of Books, suitable for New Year Presents. *Orders from the Country carefully attended to, and Merchants supplied.*

BOOK-BINDING.

D. A. solicits the attention of the Public to this branch of the business, as it is conducted on the most approved principles of the trade, and cannot be equalled by any out of the metropolis, and at the lowest possible prices. To assist in the selection of patterns, an extensive variety of Ornamental Designs are to be seen at the Shop, or sent to order for inspection.

Gentlemen's Libraries cleaned and repaired.

P R I N T I N G.

D. A. in calling the attention of the Public to this department of his business, begs to state, that no expense has been spared to render his Printing Office the most complete of any in the district. Having the finest and most varied display of Printing Types, he can execute Shop, Posting, and Hand Bills, Pamphlets, Catalogues, Cards, Circulars, &c., &c., and every description of JOB PRINTING, in the best manner, and at the cheapest rate. His Types which are all new, warrants him in making this statement; and as there is only one profit betwixt the employer and employed, at a saving of at least 25 per cent., he therefore hopes to meet from a discerning public, a farther extension of their patronage.

CLOTHING CONTRACTS.

D. WILLOCKS

Takes this opportunity of intimating that he still continues to

CONTRACT FOR GENTLEMEN'S CLOTHING,

EITHER BY THE SUIT OR BY THE YEAR.

This system, which has been found to work so well in other places, is found admirably adapted for professional men, as it enables them, at a moderate expenditure, to maintain their wardrobe always in the best condition. In order the better to enable him to transact business in this department, the advertiser has qualified himself for measuring; and he can assure those entrusting him with their commands, that, as he only employs the best tradesmen, a handsome cut and first-rate workmanship may be relied upon.

NO SLOP CLOTHING, SLOP WORKMEN, NOR SLOP CLOTHS.

HENRY S, WHYTE,

16, HIGH-STREET, MONTROSE,

IN returning sincere thanks to his friends and the public for the very liberal patronage he has hitherto received, begs to say that it will always be his endeavour to merit its continuance; and to those who have not as yet favoured him with a call, he feels assured that a single trial would at once convince them of the neatness and substantiality of his workmanship as well as the lowness of his charges.

BINDING executed to any pattern. SCHOOL BOOKS strongly bound.

MUSIC carefully mended and bound on the shortest notice.

GENTLEMEN'S LIBRARIES repaired, cleaned, and arranged, at their residences if required.

DAVID STRAITON,

WATCHMAKER,

FEELS deeply grateful to the Nobility, Gentry, and the Public, for their past favours, and begs to intimate, that his best exertions shall be used to merit a continuance of their patronage and support.

 CLOCKS, &c., always on hand, at very reasonable prices.

CLOCKS AND WATCHES CAREFULLY REPAIRED.

N.B.—A sober, steady Man, a good workman, in the Watch line, wanted immediately. Also, an Apprentice. One from the country will be preferred.

Montrose, 18th December, 1845.

ADVERTISEMENTS.

JAMES DORWARD,

TEA AND SPIRIT MERCHANT,

AFTER eighteen months' experience in business in Stonehaven, which has given him entire satisfaction, begs to render his acknowledgements for the same, and in doing so, would advert to the prospectus which he issued at the commencement. It was therein promised, in the most advised terms, and by a statement the most guarded, that his customers would be supplied with Tea, Coffee, and other articles, on a footing with those of any provincial town, and this was responded to by a most extensive patronage, which—ever increasing—is ample testimony to the fact, that these promises have been realized.

Knowing that his exertions are thus fully appreciated by the public, J. D. feels thereby stimulated to greater efforts in the same way, and it will be his constant endeavour to keep reducing his Scale of Profits to the proportion warranted by extensive trade.

Regarding Tea, in particular, from his arrangements for supplies, combined with his knowledge of the trade, J. D. feels warranted in repeating his assertion of a former occasion, that his customers are supplied with that article cheaper than those who pretend to be his rivals in Stonehaven, can purchase.

Stonehaven, Nov. 29, 1845.

ANDREW KERR,

ORNAMENTAL HAIR MANUFACTURER, WIG-MAKER
HAIR-CUTTER, AND PERFUMER, &c.

55, MURRAY STREET, MONTROSE,

IN thanking the Ladies and Gentlemen of Montrose and surrounding country for their liberal patronage during a period of twenty years, begs to announce that, in order to afford that accommodation which is requisite to the proper management of his increasing business, he has divided his Premises into different Apartments, and fitted them up in such a manner as he trusts will be found adapted to the taste and convenience of all classes of his customers.

A. K. has of late succeeded in effecting a manifest

IMPROVEMENT IN THE MAKING OF GENTLEMEN'S WIGS,

which is by various persons of refined taste now wearing them, regarded as being superior to any made in this district, at prices as low as the commonest make. Also, LADIES' BRAIDS and FRONTLETS, with the much admired PATENT SKIN PARTINGS. An elegant assortment of

PERFUMERY, COMBS AND BRUSHES,
of the best quality, very cheap.

Families attended at their own residences.—Ladies taught hair-dressing.

 Particular attention paid to hair-cutting.

VENTILATING WIG.

A. M. begs respectfully to intimate that he has recently introduced into Montrose,

THE NEW VENTILATING WIG,

which is admirably adapted to the peculiar form and construction of every head, of exceedingly light texture, of first-rate workmanship, and very durable. He trusts that this hitherto unknown invention, which, he is confident, entirely supersedes, and is far preferable to the former article, will meet with that approbation which it so deservedly merits.

FRONTLETS EXECUTED ON THE SAME PRINCIPLE.

Montrose, December, 1845.

RHENISH, MOSELLE, AND CHAMPAGNE WINES.

THE Subscriber begs to intimate that he is appointed AGENT in this quarter for Messrs JOSEPH WERNER, SON, Maintz-on-the-Rhine.

He can furnish prices, and will be glad to receive Orders for the WINES supplied by the above respectable House, the quality of which, he feels confident, will give every satisfaction.

NEW BONNET, LACE, FUR, BOOT, SHOE, STAY, RIBBON, and FLOWER WAREHOUSE, under the management of Miss Ross, a young lady of considerable experience in the business. An Establishment of this kind having been long called for in town, the Subscribers have, at considerable cost, fitted up, and laid in, an EXTENSIVE and VALUABLE STOCK of very RICH GOODS, which they will exert themselves to keep up, in expectation of a continuance of the great support with which they have already been so highly favoured, from ladies in town and country.

LIST OF STOCK :

Bonnets, in Fancy and Plain, Diagonal, and the New Patent Cross-over Porcupine; Straws, in whole Dunstable, and Devonshire, Bird's-eye, &c. &c.—in all about 70 doz., for the spring and summer of 1846.

It is not generally known that straw workers in London and elsewhere make up the best of their straw in winter, being a time when not only work is to be had cheapest but the straw is then in better working order and unpicked—hitherto we have maintained a character for *selling cheap* Straw Bonnets; and from the arrangements we have made for the Spring and Summer supplies with two of the most noted London houses, and from the increased convenience of the above Establishment, we trust to be able to please our numerous customers better than heretofore.

Girls' Bonnets 5d. each. Ladies' Common Coarse Straw, 8d. each; better, 10d.; good, 1s. 2d. Girls' Finest do., 5s. each. Ladies' Finest Straw, 10s. each; Finest Diagonal (quite new), 8s. and 10s.; Common do., the same style, 2s. 6d., 3s. 6d., and 4s. SOUTH PORT

General Grocery, Provision, and Spirit Establishment.

JAMES WOOD takes the present opportunity of returning thanks to his numerous customers in Brechin, and surrounding country, for the very liberal support he has experienced since he commenced business, and being convinced that the only system for carrying on an extensive trade is by keeping always the best Articles, and charging the smallest remunerating profits—by acting on this principle, he trusts to merit a continuance of former patronage.

J. W. in mentioning a few of the leading articles in his line considers it quite unnecessary to quote prices as they often vary; but begs to assure those who may favour him with a call that it shall always be his study to supply them with Goods, which, upon trial, will be found not to be surpassed, if equalled, by any in the place.

NEW INVENTIONS.

THE Advertiser having seen the folly practised in many of our Scotch Hospitals of using Suspensory Bandages, calculated only to do evil,—and as he thinks it none of the least ends for which man was created,—that of assisting his fellow-man,—he now offers, to those afflicted with HYDROCELE or RUPTURE, that cannot be returned, a NEW SUSPENSORY BANDAGE, superior to every other. Another evil attending those who require a STEEL TRUSS is, that they have no certain way of knowing the strength of one Spring from another; but, by a machine now invented, that difficulty is entirely overcome. Lastly, a cheap method of COVERING TRUSSES, and preventing them from rust. Letters from some of the most celebrated Doctors may be seen, and other particulars learned from the Subscriber.

REMOVAL.

GENERAL FURNISHING WAREHOUSE, UPPER-WYND, BRECHIN.

JOHNDON respectfully begs to acquaint his friends and the public, that he intends removing, in a few weeks from his present Shop in the High-street, to his

NEW PREMISES, IN UPPER-WYND,

which have lately been fitted up, in the most convenient and modern style, especially with the view to more suitable and extensive accommodation for carrying on his business than he now has, or finds it possible to obtain in his present premises.

J. DON also embraces this opportunity of expressing his gratitude to the public generally, for the liberal encouragement he has received since commencing business in Brechin five years ago; and begs to assure them, that no exertion or attention shall be wanting on his part to merit a continuance of their favour.

His Stock in the LINEN and WOOLLEN DRAPERY, as well as in the FURNISHING and GENERAL IRONMONGERY DEPARTMENTS, will, as hitherto, consist of a large and carefully selected assortment of useful and fashionable goods, so that families and others will find with him what is rarely to be met with now-a-days, viz., a GENERAL HOUSEHOLD FURNISHING ESTABLISHMENT, conducted on the approved principle of *small profits*, and asking the lowest possible price *at once*, from which *no abatement* can be made.

N.B.—Orders sent either by letter or otherwise will be punctually and carefully attended to.

Brechin, December, 1845.

* In using this Table, take from the Kalendar the time of High Water at Leith; add to it the time opposite the place required when the sign + is prefixed; subtract it when the mark — occurs. Thus the time of High Water at Leith in the morning of January 1 is 4h. 32m.; the time in this Table opposite Liverpool is — 3h. 0m.; and by subtracting this from the former there is obtained 1h. 32m. for the morning tide at Liverpool on the day required.

Farmer's and Grazier's Kalendar.—In fresh weather the plough may be set in motion. Turn over stubble-lands intended for green crops or summer fallows. Frost with correct wet ploughing; but this operation should seldom be performed unless the soil is moderately dry. During frost apply composts; manure may be taken to distant fields, and deposited in large heaps or scattered on the surface. Thrash grain, so as to afford ample supplies of straw for littering courts. This and the following month constitute the chief season for converting straw into manure.—Devote attention to live stock, by affording shelter and supplying food at regular hours. Keep fattening cattle dry, and give them stored roots during frost. Cows require succulent roots, or food prepared by steam or hot water, to yield milk copiously. Shelter new-dropt lambs, and give their dams roots, hay, and bruised grain, or lintseed cake. Ewes will not produce fat lambs at this season without nutritious food.

Gardener's Kalendar.—When the frost is not severe, trench, manure, and turn up in ridges all vacant ground, and prepare hotbeds. In open and dry weather, sow in mild exposures, for a succession, a few early-frame pease, common beans, short-topped radishes, lettuces, carrots, onions, spinach, and curled parsley, protecting them from the frost by mats or straw; and, in hotbeds, sow cauliflowers, melons, cucumbers, small salading, early cabbages, and kidney-beans. Plant, prune, and train standard and wall fruit-trees, gooseberry, raspberry, and currant bushes. Edge beds, form new flower-gardens, and shelter from frost tender evergreens, tulips, ranunculuses, &c. Pot choice dahlias, placing them in a stove or hotbed. Air and keep dry carnations and stage auriculas. Plant snowdrops, crocuses, gladioluses, irises, &c.

Bank-Holidays are marked †. When they fall on a Sunday, they are held on the following day.

Farmer's and Grazier's Kalendar.—Frost being a powerful agent in obtaining mould for covering seeds, plough grass and other lands intended to produce a crop. Whether turnip be folded or carried from the field, plough the land as the crop is removed, and wheat-sowing may follow. Beans and oats may be sown; but it is only rich dry soils which can be seeded so early with prospect of success. In mild weather thorn hedges may be dressed, and new ones planted. Lay up stores of seed-corn, put implements into working trim, and execute many little jobs, that no interruption may be experienced in sowing-time.—Animals about to bring forth merit particular attention,—the supply of milk and strength of offspring being affected by the dam's treatment previous to birth. Keep calves warm, clean, and dry; give hay and sliced roots in addition to liquid food to such as are rearing.

Gardener's Kalendar.—Make ready all the ground intended for early crops; and, when the weather is favourable, continue to sow every fortnight pease, beans, onions, spinach, savoy, lettuces, celery, cauliflowers, carrots, parsnips, and radishes, as directed in the kalendar for the preceding month. Cut early kidney potatoes for seed, and put them into the stove or hotbed in order to start them for planting out. Clean shrub-beries, roll walks and lawns, and plant out evergreens and shrubs of all kinds, particularly roses. Put cuttings into rich light soil in well-sheltered borders, and plant stocks of the common wild rose for standards on which to bud the Chinese and other fine varieties. Protect all tender plants from the effects of frost, and air greenhouse and stage auriculas and polyanthus frames. Top-dress all fine auriculas and polyanthus in pots or boxes. Strike dahlias from roots in hotbeds, and sow balsams, cockscombs, tricolors, amarantus, sensitive and ice plants, as well as other tender annuals. Plant carnation-layers, ranunculuses, anemones, and bulbous roots, and divide the roots of herbaceous plants.

Farmer's and Grazier's Kalendar.—Continue preparations for seedtime. Finish wheat-sowing about the middle of the month. Sow beans, oats, and barley as soon as the weather and soil admit,—reserving cold wet lands till the season advances. The seeds of clover and ryegrass will succeed amongst autumnal-sown wheats, without harrowing or rolling the surface. Particular fields intended for barley or potatoes may receive a second ploughing. Prepare composts and manures for turnip. This is the best time for planting hedges.—In altering the diet of fattening animals, always let the change be to one more nutritious. Part of the fattening cattle may be allowed bruised grain or lintseed cake, which will quickly fit them for the shambles. If scarcity of turnip render a richer substitute necessary for advanced cattle intended for grass, give a small allowance, and plenty of straw. Ewes will lamb freely on arable farms, and seldom require any kind of food but grass and turnip.

Gardener's Kalendar.—The principal crops of vegetables should be put into the ground this month. Sow asparagus, celery, cauliflower, Brussels sprouts, beets, brocoli, spinach, onions, Dutch turnips, carrots, pease and beans, savoys, parsnips, and turnip-rooted radishes. Plant red cabbage, sea-kale, kidney-beans, and cauliflowers from frames; and sow cucumbers and melons in hotbeds. Finish pruning, dress borders and strawberry beds. This is the best time to graft fruit-trees, and the China, perpetual, moss, and rosette roses, on the common brier or bluish China rose, and to propagate them by layers. Pot dahlias that have pushed, and also cuttings from the offsets, placing them in a moderate heat. Protect tender plants and blossoms, and sow polyanthus, auricula, and almost every kind of perennial, biennial, and annual seeds.

Farmer's and Grazier's Kalendar.—This is the most important seed-month, and no favourable opportunity should be lost to sow grain crops. Harrow and roll clover and ryegrass sown amongst wheat, to ensure the seed germinating. Store the residue of the turnip crop, to preserve the bulbs and prevent the exhaustion of soil. Drain lands intended for green crop where previously neglected. Potatoes may be planted in favourable situations. Finish planting thorn hedges.—On store farms, this is the chief lambing season, and the shepherd's utmost attention is necessary. Cease folding turnip, and either feed sheep on stored roots, or restrict them to grass. Fattening lamb-hogs require good pasture, being unable to eat turnip freely, from shedding teeth. When there is a scarcity of keep at the homestead, lean cattle may be allowed to roam over permanent pastures. Seedling grasses will seldom admit of being depastured with cattle.

Gardener's Kalendar.—Sow whatever was omitted last month, and plant out such of the pot-herbs as are ready for that purpose. Continue to sow and plant out rhubarb, artichokes, asparagus, nasturtiums, sea-kale, Dutch turnips, German greens, and small saladings. Earth up pease, tie up lettuces, and in very dry weather water seedling beds. Finish the grafting of fruit-trees, and train and clean walks and edgings. Sow annuals, biennials, and perennials. Plant evergreens, and propagate by cuttings jasmine, lavender, sage, rosemary, rue, &c., and all the woody kitchen shrubs. Sow dahlias, carnations, pinks, hollyhocks, Cape, Blompton, and German stocks, China asters, and all kinds of hardy annuals. Destroy the green fly on roses, and preserve the bloom of stage auriculas from sun and rain. Top-dress all flowers in pots by removing withered leaves, and put in fresh earth. Hoe and rake gravel walks, cut box-edgings, and mow grass plots.

Farmer's and Grazier's Kalendar.—Conclude the sowing of grain crops; and, with the advance of the season, use early varieties. From necessity, barley and pease may be sown up to the end of the month; but early-sown spring crops are generally the most valuable. Be diligent in preparing soils for potatoes and turnip; and by judiciously using harrow and roller, endeavour to retain moisture, and produce a fine tilth. Finish potato planting. Give a second ploughing to summer fallow, and never allow vegetation to make progress at this season on its surface.—Fattening cattle may be continued on well-kept Swedish turnip and potatoes. When there is a sufficiency of grass, and the soil becomes dry, stock pastures with all descriptions of cattle. In cold and wet evenings, shelter milch cows and fat cattle in courts. Wean early calves, and turn late ones out to pasture.

Gardener's Kalendar.—Sow capsicums, cauliflowers, carrots, lettuces, spinach, Knight's marrow-fat pease, cucumbers, red beet for pickling, and a full crop of kidney and French beans. Transplant cabbages, winter-greens, lettuces, cauliflowers, and celery. Hoe and stake pease, water newly planted crops, and propagate aromatic plants by slips or cuttings. Plant out dahlias if there be no appearance of frost, and protect from wind and rain choice tulips, ranunculuses, and anemones. Propagate herbaceous plants by dividing the roots; wallflowers, sweet-williams, lychnis, and rockets, by slips; and China roses, calceolarias, mimulus, &c. by cuttings. Put out into the open border calceolarias, pelargoniums, fuchsias, salvias, the verbenas melindris, with other greenhouse plants. Sow biennials and perennials if formerly omitted.

Farmer's and Grazier's Kalendar.—This is the month for sowing turnip. Put Swedes into the earth between 20th May and 10th June. All other varieties may be sown in course of the month. Drilled crops require attention. Weeds are most easily destroyed when young; and as a general rule, use hand and horse hoes as soon as the crops admit of the operations. Earth up early-planted potatoes. Haymaking commences in early situations. Mow grasses before the plants seed; remove the crop quickly from the ground, and soon afterwards carry it to the stack.—Cattle may be best soiled this month; but the practice is seldom followed, and has little to recommend it beyond making manure. Sheep-shearing becomes general. Fleeces are proportionate to the treatment of animals; and every progression or falling off in condition may be traced in the quantity and quality of wool.

Gardener's Kalendar.—Continue sowing the vegetables directed last month, and also turnips for autumn use. Plant out brocoli, cabbages, savoys, celery, cauliflowers in shady borders, leeks, lettuces, cucumbers for pickling, and kidney-beans. Watering is requisite in dry weather both evening and morning; and also the hoeing of potatoes, cabbages, and pease. Thin out onions, leeks, carrots, parsnips, and early turnips. Gather and preserve kitchen-herbs. Shade and air melon-plants, and strike by cuttings double wallflowers, rockets, scarlet lychnis, and stocks. Transplant annuals, biennials, and perennials, and seedling pinks into a bed. Lift all hyacinths, tulips, and other bulbs that have ceased flowering; cut off the foliage an inch above the stem, and before putting by lay them in sand a fortnight. Re-pot auriculas, polyanthes, &c. Mow and roll grass walks and plots once a-forenight during this and the other summer months.

Farmer's and Grazier's Kalendar.—Conclude haymaking from artificial grasses. Single out turnip, and let hand and horse hoes be in constant requisition, with a view to improving the crops and benefiting succeeding ones. Work fallows thoroughly with plough, harrow, and roller, carefully removing root-weeds by the hand,—atmospheric influence being generally insufficient to accomplish their destruction. Execute draining, and apply lime and lime-composts when such operations are necessary. Hand-weed grain crops.—In warm weather fattening cattle and milch cows are the better of sheds, to shelter them from the sun. Throughout summer examine flocks daily, to preserve them from the attack of flies, and use the common remedies for the prevention and destruction of maggots.

Gardener's Kalendar.—In this month prepare all unoccupied plots of ground for autumn and winter crops. Sow turnips, French beans, lettuces, and black Spanish radishes. Plant out brocoli, cauliflower, savoys, leeks, and winter cabbages, and earth up celery. Lift full-grown winter onions, and prepare mushroom spawn. In fine weather, gather medicinal flowers and sweet herbs when in bloom, dressing them in the shade for winter use. Divest wall-trees, espaliers, and standards, of all superfluous shoots. Continue to water in dry weather, and gather all kinds of seeds as they advance to maturity. Propagate evergreens, roses, and other shrubs, by laying the young wood. Inoculate flowering and other shrubs, bud roses in cloudy weather, and divide the roots of double primroses, polyanthes, and auriculas. Lay or pipe carnations and pinks, take up anemones and ranunculuses, and put in cuttings of pansies, calceolarias, dahlias, Chinese chrysanthemums, geraniums, &c.

Farmer's and Grazier's Kalendar.—Conclude hand and horse hoeing turnip. Apply manure to the fallows, and immediately plough it into the soil, putting the ridges into proper form, and clearing out water-courses, to guard against wet weather. Thrash out the residue of the grain, to extirpate rats and mice before the new crop is stacked. In mountain districts haymaking from natural grasses engages the attention of store-farmers. In low situations corn-harvest will occupy all hands.—Lambs not separated from their dams last month must be weaned and put on the best pastures. On lowly-situated arable farms get in ewes for early lambing. In high districts, select and prepare the stock which is to be sent to market in the course of autumn.

Gardener's Kalendar.—Sow onions, early cabbages, and parsley, for the succeeding year; and lettuces, spinach, brocoli, and cauliflowers, to stand the winter. Earth celery; hoe and thin turnips; transplant brocoli, savoys, and cauliflowers, and the principal crop of celery into trenches for blanching. Cut those herbs which are adapted for distillation, or for winter use. Make mushroom-beds, propagate kitchen-herbs by slips, and take up all onions, garlic, and shallots that are withered in the stem. Continue to bud on fruit-trees, roses, and bushes, so long as the bark rises freely and the weather is cloudy. To obtain new varieties, sow auricula, polyanthus, and anemone seeds, and mignonette to blow in winter; as also the seeds of tulips, hyacinths, irises, and all the other bulbous-rooted flowers. Support and thin dahlias to improve their bloom. Shift tender exotics and hardy greenhouse plants into fresh pots. Keep the ground clear of weeds, and continue to water plentifully.

Farmer's and Grazier's Kalendar.—This may be considered the harvest month. Engage plenty of assisting hands for this important season. Guard against shaking winds by reaping before the juices have left the straw; and to avoid sprouting, keep cut crops always standing in an upright position. When the crop is fit for stacking, carry it by day and by night, and cover the stacks as soon as they are built. Prudent farmers provide stores of ropes and thatch before harvest commences. Hand-weed turnip where necessary. Finish fallows; and such as are wet and coldly situated may be sown with wheat.—On arable farms, weaned lambs and ewes for early lambing may be allowed to depasture stubbles and seedling grass. The breeders, rearers, and feeders of stock will meet at the different markets, and make arrangements for their customary changes of animals.

Gardener's Kalendar.—The operations of this month are not very numerous. Sow vegetable seeds for a spring-crop, and plant broccoli, cauliflowers, savoy, German greens, leeks, lettuces, celery, and perennial aromatic and pot herbs. Hoe winter spinach and turnips, earth up celery and cardoons, weed cauliflowers and young onions, prick out cabbage-plants, gather ripe seeds, and make mushroom-beds. Plant cuttings of gooseberries, currants, and raspberries, and also strawberries, taking out all the old stools which have twice produced fruit. Continue to divide and transplant biennial and perennial flower-roots; lay almost every kind of shrubs; and put in cuttings of evergreens, China roses, and flowering shrubs. Crocuses, snowdrops, Persian irises, dog's-tooth violets, fritillarias, crown imperials, narcissuses, and most of the other bulbous roots, may now be planted. All the rooted pinks and carnations may be planted out. Sow hardy annuals to stand the winter, and trench up ground in which to plant tulips and hyacinths during October or November.

Farmer's and Grazier's Kalendar.—Harvest being finished, employ the plough in preparing soils for wheat. Commence with the wettest lands, and only defer sowing such as are dry and situated in an early climate. Use the common preventatives for smut immediately before scattering the seed, and never sow unless there be sufficient moisture in the soil to effect germination. A good deal of thrashing is commonly requisite for supplies of cash, straw, and seed-wheat. Gather the potato crop, and carefully secure it from frost.—Unless there is abundance of grass, fattening cattle and sheep should be supplied with turnip on the pastures. Towards the middle of the month remove fattening cattle to the courts, and shelter milch cows during night. Keep weakly calves warm, and allow them a portion of nourishing food.

Gardener's Kalendar.—Sow radish, lettuce, and carrot seeds; also early pease and beans in a warm exposure. Plant horse-radishes, lettuces, early cabbages, and other greens neglected last month, in sheltered situations; also cauliflowers, mint, and tarragon in frames, for winter use. Earth up savoys and cabbages as high as the leaves. Take up carrots and parsnips, cut off their tops, and bury them in dry sand. Crop the tops of parsley, to make fresh leaves for winter. Plant all deciduous trees and shrubs. Commence pruning, taking the vertical branches in fruit-trees, and cutting obliquely to prevent rain from lodging; also roses, honeysuckle, and other flowering shrubs. Protect dahlias, young carnations, and layers, from sudden frost; and, about the end of the month, begin to plant hyacinths, tulips, ranunculuses, and anemones. In favourable weather, transplant hardy fibrous-rooted plants, intermixing them in the borders, to keep up a succession in the flowering season.

Farmer's and Grazier's Kalender.—Conclude potato harvest. Finish wheat sowing, although this grain may be sown any time on rich dry soils up to the middle of March. At this season, as newly ploughed land receiving rain seldom becomes dry, sow wheat from day to day as the soil is turned over. Store turnip to use in frosty weather; and wheat may be sown where the crop is removed. Form lime-composts for applying in spring and summer. This is the best time for draining soils intended for green crop and fallow. Dress hedges and ditches.—Sheep intended to be fatted should be folded on turnip, and allowed dry fodder. Lamb-hogs will thrive best with an allowance of turnip on pastures. To all flocks apply the salves and lotions in common use. Cattle of all descriptions should receive fodder and shelter during night, and such as are fattening be shut out from the pastures.

Gardener's Kalender.—Although hazardous, early pease and beans may be sown in a warm border; if neglected, most vegetables recommended in the last two months may still be planted, earthed up, &c., taking care to protect them from frost. Force sea-kale, rhubarb, and asparagus. Prune and plant fruit trees and bushes; and finish flowering shrubs and trees. Transplant seedling stocks, and suckers taken from the roots of the pear, codling, plum, and quince trees, to prepare them for budding or grafting different fruits upon; also stocks of the tree-rose, for budding upon them the garden and Chinese varieties. Shelter choice flowers. To make the colours of the tulip distinct, the compost ought to be changed every alternate year; an operation which should be performed this month. Tulip-soil should be one-third of fresh, light, turfy loam; one-third of fine sand; and one-third of sandy peat, or leaf-mould. Take up dahlia roots whenever the bloom is nipped by frost, and keep them in sand free from damp.

Farmer's and Grazier's Kalender.—Continue to plough stubbles. Store turnip in mild weather. A great deal of straw will be requisite; and regulate thrashing, so that there may be enough to last throughout the season. As general winter employment, in mild weather dress ditches and repair fences, drain and add by every possible means to the stores of compost and putrescent manure. During frosty weather bring forward materials for drains and composts, and remove all heavy commodities which require a firm surface for transport.—Cattle of every description should now be in winter quarters, and receive winter fare. Separate the weak from the strong. Have a constant supply of water to store cattle, and apportion their litter and food so that they may last until the arrival of the grass season. Give fattening cattle at all times as much as they can eat, commencing with globe turnip, and proceeding with food of increasing richness.

Gardener's Kalender.—Prepare for future operations, by digging, manuring, or trenching vacant ground, and collecting dung, leaves, and turf, to make compost. In mild weather, a few early pease and radishes may be sown in a warm border, and small salads and cucumbers in hotbeds. Cover with fern, straw, litter, or mats, all such plants as are likely to be injured by the frost, either in the open ground or in frames, admitting free supplies of air when the weather is favourable. Plant and prune all kinds of trees and bushes, taking care to stake the trees that are newly planted. In pruning roses, remove the old wood, curtail the young straggling branches, adding good store of decayed manure. Fine auriculas, polyanthus, and carnations must now be treated with great care.

FAIRS, CATTLE-MARKETS, & TRYSTS IN SCOTLAND.

WHEN the appointed day happens to fall on Saturday, Sunday, or Monday, the fair is generally deferred till the Tuesday following. Fairs which are held according to the Old Style, are distinguished by the letters *o s* placed after the day indicated. In some parts of the country the difference between the Old and New Styles is computed to be *eleven*, in others *twelve* days,—the *Old* being reckoned to be so much later than the *New* Style.

STATE OF THE FIARS-PRICES

OF THE DIFFERENT COUNTIES IN SCOTLAND FOR CROP AND YEAR 1844.

The following Tables have been prepared from authentic documents in the Teind-Office by an Accountant of experience, and their accuracy may be entirely relied on. The average is that of the seven years, from 1838 to 1844 inclusive; but in a few cases, distinguished by an asterisk, that of six years only. Where blanks occur, no average could be given, the Fiars not having been regularly struck.

The Grain is computed by the Imperial Quarter,—the Meal by the Boll of 140 Imperial Pounds.

Canadian Wheat and Flour.—By an Act passed on 12th July 1843, Wheat grown in the Province of Canada may be imported into the United Kingdom at a fixed duty of 1s. per quarter, every barrel of wheat flour of 196 lbs. paying a duty equal to that on 38½ galls. of wheat. This reduction was made in consequence of the imposition of 3s. per quarter on wheat imported into Canada, except from the United Kingdom or any of her Majesty's possessions, and being the growth and produce thereof.—The produce of the forest and of agriculture of those parts of the State of Maine watered by the river St John and its tributaries is to be treated as the produce of New Brunswick.

Allowances on Bonded Corn.—The following allowances are made for the natural decrease on corn in warehouse, on the exportation thereof or entry for home consumption:—Wheat, barley, and rye, 1 month and less than 3 m. 1½ per cent.; 3 m. and under 6 m. 2 per cent.; 6 m. and less than 12 m. 2½ per cent.; 12 m. and upwards, 3 per cent. Oats, 1 m. and less than 3 m. 2½ per cent.; 3 m. and less than 6 m. 3½ per cent.; 6 m. and less than 12 m. 4½ per cent.; 12 m. and upwards, 5 per cent. On Spanish wheat, barley, and oats, and on wheat and barley kiln-dried abroad, only half the allowance is to be made, and none on rye kiln-dried. No allowance unless where actual deficiency.

Substitution of Flour or Biscuit for Bonded Wheat.—Wheat is permitted, till August 31, 1848, to be delivered from warehouse or vessel duty free, upon the previous substitution of an equivalent quantity of flour or biscuit. The proportions are, for every 96 lbs. of kiln-dried wheat, or every 100 lbs. of wheat not kiln-dried, 78 lbs. fine wheat flour, 68 lbs. of captain's biscuit, 80 lbs. of the standard biscuit supplied to the navy, or 118 lbs. common ship-biscuit.—The flour not removable for home consumption, except on payment of the import-duty, and not sooner than four weeks from time of deposit; and the biscuit not permitted to be taken for home use.

IMPERIAL STANDARD MEASURES.

I. MEASURE OF LENGTH.

- 12 inches = 1 foot
 3 feet = 1 yard
 5½ yards = 1 pole
 40 poles = 1 furlong
 8 furlongs = 1 mile or 1760 yards

Special Measures of Length.

- Hand = 4 inches; fathom = 6 feet;
 69·121 miles = 1 geographical degree;
 100 links = 1 chain, or 66 feet.

II. MEASURE OF SURFACE.

- 144 square inches = 1 square foot
 9 square feet = 1 square yard
 30½ square yards = 1 square pole
 40 square poles = 1 rood
 4 roods = 1 acre
 640 acres = 1 square mile

Special Measures of Surface.

- 10 square chains make 1 acre; 36 square yards of stone, brick, or slate work are termed a rood; and 100 square feet of flooring a square.

III. MEASURES OF CAPACITY.

1. General Measure of Solidity.

- 1728 cubic inches = 1 cubic foot
 27 cubic feet = 1 cubic yard
 5 cubic feet = 1 barrel bulk

2. Measure for Liquids, Corn, &c.

- 5 oz. avoird. water = 1 gill
 4 gills = 1 pint
 2 pints = 1 quart
 4 quarts = 1 gallon
 2 gallons = 1 peck
 4 pecks = 1 bushel
 8 bushels = 1 quarter
 10 quarters = 1 last

dry
goods
only.

IV. MEASURES OF WEIGHT.

1. AVOIRDUPOIS WEIGHT.

- 27·344 troy grains = 1 dram
 16 drams = 1 ounce
 16 ounces = 1 pound
 14 pounds = 1 stone
 2 stones = 1 quarter
 4 quarters = 1 hundredwt.
 20 hundredwt. = 1 ton

Used generally in commerce.

*Special Divisions of Avoird. Weight.**Wool Weight.*

- 2 stones = 1 tod
 6½ tods = 1 wey
 2 weys = 1 sack
 12 sacks = 1 last

The pack is 240 lbs.

Hay and Straw Weight.

- 36 lbs. straw = 1 truss
 60 .. new hay
 (till 1st Sept.) = 1 truss
 56 .. old hay = 1 truss
 36 trusses = 1 load

Flour Weight.

- 1 stone = 14 pounds
 1 bushel = 56 pounds
 1 boll = 140 pounds
 1 sack = 2½ cwt.

2. TROY WEIGHT.

- 24 grains = 1 pennyweight
 20 pennyweights = 1 ounce
 12 ounces = 1 pound

Used for weighing gold, silver, &c.

APOTHECARIES' WEIGHT.—20 troy grains = 1 scruple; 3 scruples = 1 dram; 8 drams = 1 ounce.—This weight is used in medical prescriptions only.

RULE FOR ASCERTAINING THE WEIGHT OF HAY.

Measure the length and breadth of the stack; then take its height from the ground to the eaves, and add to this last one-half of the height from the eaves to the top: Multiply the length by the breadth, and the product by the height, all expressed in feet; divide the amount by 27, to find the cubic yards, which multiply by the number of stones supposed to be in a cubic yard (viz. in a stack of new hay, six stones; if the stack has stood a considerable time, eight stones; and if old hay, nine stones), and you have the weight in stones. For example, suppose a stack to be 60 feet in length, 30 in breadth, 12 in height from the ground to the eaves, and 9 (the half of which is 4½ from the eaves to the top; then $60 \times 30 \times 16½ = 29700$, and $29700 \div 27 = 1100$, and $1100 \times 9 = 9900$ stones of old hay

RULE FOR ASCERTAINING THE WEIGHT OF CATTLE.

Measure the girt close behind the shoulder, and the length from the fore-part of the shoulder-blade along the back to the bone at the tail, which is in a vertical line with the buttock, both in feet. Multiply the square of the girt, expressed in feet, by five times the length, and divide the product by 21; the quotient is the weight, nearly, of the four quarters, in imperial stones of 14 lbs. avoirdupois. For example, if the girt be $6\frac{1}{2}$ feet, and the length $5\frac{1}{2}$ feet, we shall have $6\frac{1}{2} \times 6\frac{1}{2} = 42\frac{1}{4}$, and $5\frac{1}{2} \times 5 = 26\frac{1}{2}$;

then $42\frac{1}{4} \times 26\frac{1}{2} = 1109\frac{1}{8}$, and this, divided by 21, gives $52\frac{1}{2}$ stones nearly, or 52 stones 11 lbs. It is to be observed, however, that in very fat cattle the four quarters will be about one-twentieth more, while in those in a very lean state they will be one-twentieth less, than the weight obtained by the rule. The four quarters are little more than half the weight of the living animal; the skin weighing about the eighteenth part, and the tallow about the twelfth part of the whole.

TO MEASURE BROKEN METAL FOR ROADS.

Metal for roads is generally undertaken to be broken at so much per 16 solid or cubic feet, to which quantity, whatever the real weight may be, the term ton has been applied.—*To ascertain the Number of such Tons in any Quantity of Broken Metal, of a Square or Oblong Form.*—**RULE.** When the length and breadth are greater at the ground than at the top, take the length both at the ground and top, add these together, and divide their sum by 2 for the mean length; find the mean breadth in the same way, and if it seems to be of an unequal depth, take several depths, add these together; their sum, divided by the number of depths taken, will give the mean depth. Having thus found the dimensions in feet and inches, multiply the length by the breadth, and their product by the depth; this last, divided by 16, will give the number of tons.

Or more simply thus—Having found the dimensions, as above directed, reduce them all to inches, then multiply the breadth by the depth, and their product by the length; this last product, divided by 1728, will give the contents in solid feet; and these divided by 16, will give the number of tons.

The above Rule also applies to DUNGHILLS, with this difference, that the division is made by 27 for *cubic yards*, instead of by 16 for *tons*.

TO MEASURE DRAINS OR DITCHES.

RULE. Take the width at the top and bottom, add these together, their sum divided by 2 will give the mean width; then multiply the width, perpendicular height, and length together; their product, divided by 27 (the dimensions being taken in feet and inches), will give the contents in cubic yards, &c.

MANURING.

To find the Number of Cart Loads, the Number of Heaps in each Load being known, which will be required for Manuring any Quantity of Land, the Rows and Heaps being Equally Distant.—**RULE.** Reduce the quantity of land to be manured and the distance of the heaps or rows to the same denomination; the quantity of land, divided by the product of the square of the distance of the heaps or rows, multiplied by the number of heaps in the load, will give the number of loads required.

To find the Number of Heaps which will be required for Manuring any Quantity of Land, the Heaps and Rows being of an Unequal Distance.—**RULE.** Reduce the distance of the heaps, the distance of the rows, and the quantity of land, all to the same denomination; then multiply the distance of the heaps by the distance of the rows, and divide the quantity of land by their product.
